

Stephen McKinnis

Cell: 619.913.3101 steve@stevemckinnis.com

I have been a graphic designer & web designer for over twenty years. I started out as a freelance artist as an undergraduate in Communications at Hastings College. I have worked for radio stations and television stations, including an ABC affiliate and I have written for newspapers since I was in High School. I have won logo design contests such as the Recreation Design at the University Of Nebraska-Lincoln, the Media Ethics Logo Design Contest for Hastings College to a logo contest, most recently for the Acura Tennis Classic (2007) in San Diego, CA.

I have my bachelor's degree in Communications from Hastings College and was also a Telecommunications Graduate Student at San Diego State University. My sites have been recognized for their artistic merit and originality. Most recently MyFarrah.com was given a four star out of four star rating for website design (2009) and is also recommended on Killer Startups (2010). Also in 2010 I received the Award for Excellence as a San Diego Web Designer from Talk of the Town and again received this award in up to this past October, 2019.

You can see examples of my custom design website work at <https://stevemckinnis.com> as well as read some client reviews on Google and on YELP.

I have a very creative mindset, but I also have the temperament that allows me to work with anyone. I remain calm, fixated on the project, task or product at hand, and I know how to listen and put the clients' goals, visions and fiscal constraints to work for them. These are assets and skills honed over the years from working with every type of management style. I would and could benefit any corporation with my skill set, my personality and my drive to work and make the best product or promotion possible for whomever it is that is seeking my work and input.

I also have a profile on linkedin with professional recommendations for my work at
